Highlights

Quality construction
Quality construction uses only top grade materials to create products of extended durability.

Gold-plated connectors
Gold-plated connectors provide better conductivity by lowering contact resistance. They also prevent connector deterioration through oxidation.

Corrosion-resistant connectors
Compressed brass with 24K gold-electroplated connectors creates a secure and extremely durable connection that optimizes signal quality and delivers the best picture and data transfer.

Flexible PVC Jacket
Flexible PVC jacket provided protection to the delicate core of the cable. It also offers extended durability and ease of installation.

Molded ends
Molded ends prevent fraying and extend the life of your cable.

Molded thumb screws
Easily turn the connectors with your fingers. No screwdriver or tools are required.

Rubber strain relief
Rubber strain relief provides a secure, yet flexible juncture between the cable and the plug.
